

Disclaimer regarding the reintroduction research paper supplemental reading:

Although this research is a great resource to get students thinking about the pros, cons, and complications regarding reintroduction, this is not a perfect analogy for reintroduction in California. Things that worked/didn't work for the reintroduction projects discussed in this paper may not apply to a reintroduction in CA, and there may be other issues to be considered in a CA grizzly reintroduction that are not discussed here. Remind students that this is to be used as an example, not a perfect guide or answer key for reintroducing bears to California.
